

## PROJECT LIST **INDIA**

Hochiki Europe India Branch

## MAXXIS RUBBER

2 Hochiki Fire Panels  
152 Beam Detectors  
1000 Smoke Sensors  
144 Manual Call Points  
144 Wall Sounders

## EAST COAST RAILWAY

### KHURDA DIVISION

1,200+ across  
9 Railways

## INS VIRAAT

The longest serving warship in the world,

## OVERVIEW

Hochiki is a wholly independent, multinational, publicly listed group of companies with over 2000 employees working across six manufacturing plants, 38 sales offices and 14 subsidiaries. One of the world's leading manufacturers of commercial and industrial fire detection and emergency lighting solutions, Hochiki has acquired global acceptance as the benchmark for high-integrity and long-term reliability.

Hochiki's facilities in Japan, the United States of America and Europe design and manufacture products and provide technical support suited to local standards and customer requirements. Total commitment to meeting the needs of individual national markets has reinforced the company's global reputation, resulting in Hochiki products being installed in many prestigious sites and in over 80 countries worldwide.

Hochiki's life safety platforms have been installed in a number of major projects around UK, the following pages are just some cases where we were installed.

Our **ESP** Intelligent devices fire detection and alarm equipment has been designed and manufactured to the highest international standards, offering a solution of incomparable reliability.

The **Linear Heat Detection Cable (LHDC)** System from Hochiki is designed to provide early detection of fire and overheating in circumstances where other forms of detection would not be viable.

Our **Intrinsically Safe** designed and produced to ensure that all the great benefits of Hochiki's high quality fire detection technology can be safely operated within industrial and hazardous environments.

**Ekho** is a wireless based family of products which can be fully integrated into Hochiki's renowned ESP intelligent hardwired system.

Ekho is the next generation of hybrid wireless fire detection from Hochiki and will eventually supersede the FIREwave system.

Our **FIRElink High Sensitivity Air Sampling System** is able to give warning to the very slightest trace of smoke. All detectors in the FIRElink range have been approved to EN54-20:2006 Classes A, B & C by LPCB.

The **FIREbeam** is a beam smoke detector, and what this means in simple terms is that the device emits a beam of invisible light, which is constantly reflected back and monitored.

Our **CDX** conventional range of automatic fire detection and alarm equipment is designed and manufactured to the highest international standards.

Our own **Latitude** Fire Control Panel combines the very latest hardware and software to produce a control and indication system, which is powerful and sophisticated, yet simple to use and understand.

**FIREscape Nepto** Emergency Lighting offers a completely unique, cost effective and fully compliant emergency lighting system. FIREscape Nepto is based around an addressable, emergency lighting control system.

Our **Safety Integrity Levels** are part of a larger scheme called Functional Safety that deals with techniques, technologies, standards and procedures that help operators protect against hazards.

**FIREscape+** is a combined fire detection and emergency lighting system with the added benefit of wayfinding technology.

The **HFP** System from Hochiki Europe is an extremely versatile, complete life safety system which offers a simple yet dependable solution for all of your fire detection requirements.
