

38MM Vacuum Extension Tube & Bend / Kit updates:

For reasons of continuous improvement Numatic has implemented a change across 38MM Aluminium Tube sets in both machines and kits to ensure continued quality and consistency of the products.

This change enhances quality but does not alter the specification data of the items. We have substituted Aluminium tube sets with our Premium stainless steel tube sets in all products.

This substitution has been made to further our objective of ongoing commitment to quality & improvement.

602930 ALUMINIUM EXTENSION TUBE 38MM
is being replaced with
602920 STAINLESS STEEL EXTENSION TUBE 38MM
&
