

Numatic International Sustainability Policy

Objective

Numatic International recognises that we cannot continue to produce top-class cleaning equipment without addressing the environmental impact of our products and operations, we therefore pledge that Numatic International will be:

Net Zero for scope 1 and 2 emissions by 2035 **Net Zero for scope 3 emissions by 2050**

We will embark on a programme of work to address all aspects of our product's lifecycles and plan for the reduction of emissions and later offsetting where required.

We want to make Numatic International ready to transition to a Net-Zero operation. We intend to lead in the cleaning appliance sector. This policy document sets out how we will make a positive contribution to global climate action through changes in the way we manufacture products and the materials that we use.

Scope and Context

The scope of this policy covers the operations of our manufacturing site situated in Chard, Somerset, UK and all aspects of its products from raw materials and component procurement to the use phase and end-of-life management.

- We commit to an ambitious transition to a net zero economy. In 2023 we committed to set Science Based Targets, helping to limit warming to 1.5°C while meeting the global goals.
- We will take action to develop our Decarbonisation Strategy to reach our goals as stated.
- We will deliver action in the short term wherever opportunities exist.
- We will seek continual improvement of our processes, products, infrastructure and the way we conduct our business.
- We will measure and monitor our progress, adjusting our strategy to the latest science.
- We will publicly report our progress annually.
- We will assess all business projects and capital expenditure to ensure sustainability aspects have been considered.
- We will evaluate climate-related risks and grow resilience to protect our business.
- We will comply with or exceed applicable climate-related obligations and other requirements to which Numatic International subscribes.
- We will undertake to set an example of leadership in the field of climate action.

2024 Targets

- Reduce Non-Recycled Waste by 13% compared to 2023 by the end of 2024.
- Reduce Plastic Packaging per Unit Sold by 30% compared to 2023 by the end of 2024.
- Reduce our CCA (Climate Change Agreement) measured electricity and gas use by 10% by the end of 2024 compared to our 2018 CCA baseline.
- Reduce our Non-CCA measured electricity by 23% compared to 2021 by the end of 2024.
- Increase our use of recycled plastics by 9% by the end of 2024 compared to 2021.
